I was wondering if you ever got your crash course from A/Marie ? Ed's not good at follow up --

Thanks Beth, I'll check with Alice if it's OK that Amy Marie gives me the crash course on how to get the data! I'll let you know.

E --

AmyMarie is the person -- however, after talking w/ Len; seems that you can probably access this info and AMarie has offered to give you the "crash course" in finding this on the web site. Given how familiar she is w/ the data - might be worthwhile to have her do this and you can probably find other things after knowing how the information is organized.

Just let me know -- or email Len/AmyMarie what you'd like to do :)

AmyMarie is really busy working on the FFS -- but would make time to assemble the info if you prefer that.

Is there someone who can help Eugenia get the data she is requesting below? I would prefer if someone could help her download the data from PREmis, since that's what we created PREmis for, but if it would be easier to just send her the data, I guess what's easier is better.

Subject: I'd like to request some databases and data from MPI

Alice/Beth,

I would like to do some data analysis, statistics and calculations with some of our historic and current data. I'd like to obtain the following databases from MPI (I tried PREMIS but wasn't sure what to download):

- Historic core samples
- Historic bathymetric data
- Low-res and high-res cores (Have the high res been analyzed? If not, is there a proposal for these analysis?)
- Data that Ed Garvey used for his mass balance calculations, and his calculations (in spreadsheets, mathcad files or whatever package he used)
- I'd also like to get some groundwater data. Does MPI have any? I think we'll probably have to get this through DEP -we can discuss

Let me know if either you would request this to MPI or whether I can do this directly or if you want to set up a call with them. I gotta start crunching data soon!
